

Dear,

In this issue discover how the medical device industry is using MSC solutions to optimize design for improved product reliability. Join the hundreds who've benefited from attending our MD Solutions/SimXpert webinars. Also in this issue, find out how you can save 20% on our upcoming training classes to include Adams, Nastran, and Patran training. Ever wonder how other people are using MSC solutions? In the company news area, read about how Impress Group standardizes simulation with MD Nastran and SimXpert.

Thank you.

Learn easy-to-use methods for building CAE templates with SimXpert Webinar Series. Register Today!

FEATURED ARTICLES

Medical Device Manufacturers and MSC

Medical device manufacturers continue to rely on MSC solutions to optimize design for improved product reliability and time to market.

How can a medical device corporation successfully accomplish and balance both of the following critical business...

Gaining a Competitive Advantage with SimDesigner

Designers remove 3 months out of design cycle by using SimDesigner Motion to quickly evaluate torque, power and force requirements on parts and assemblies directly inside CAD environment.

Changes made late in the design cycle can increase costs by several orders of magnitude and significantly delay...

TRAINING

Mention this newsletter when you register for any of these classes held in September and we will take 20% off the course registration fee

September 22, 2008

ADM720 - Adams/Vibration

Southfield, MI
[Register Today>>](#)

September 23 - 26, 2008

ADM740 - Adams/Car

Southfield, MI
[Register Today>>](#)

September 16 - 19, 2008

NAS101 - Basics MSC Nastran Linear Static and Normal Modes Analysis

Santa Ana, CA
[Register Today >>](#)

September 29, 2008 - October 2, 2008

NAS103 - MSC Nastran Nonlinear Analysis

Wichita, KS
[Register Today>>](#)

September 22 - 26, 2008

NAS120 - Linear Statics Normal Modes and Buckling Analysis MSC Nastran & Patran

Wichita, KS
[Register Today>>](#)

September 22 - 25, 2008

PAT312 - Thermal Analysis Using Patran Thermal

Santa Ana, CA
[Register Today>>](#)

September 23 - 25, 2008

SND503 - Spacecraft Thermal Analysis Using THERMICA V4

Santa Ana, CA
