

The 19th MARC Users' Meeting, 1999

I Keynote Speech

Analysis of Fluid-Structure Coupled Problems by ALE Finite Element Method	1
The University of Tokyo	

III Rubber

Finite Element Analysis and Design of a Rubber Bearing for Seismic Isolation	59
Pusan National University	

Finite Element Analysis of Passenger Car Tire Footprint	65
Tire Research Institute of Shanghai Tire	

Design of Test Specimen to Evaluate Rubber Properties Using FEA	75
Korea Institute of Machinery & Materials	

IV Civil Engineering

Three Dimensional Numerical Simulation of Temperature and stress	107
▪ Distribution in Welding of Thick Plate	
Tsinghua University
