

## The 4<sup>th</sup> International MARC Users Conference

### *I Guest Presentation*

<b>Computer Simulation of Metal Forming, Rolling and Forging at United Technologies Corporation</b> Pratt & Whitney Aircraft (USA)	<b>1</b>
<b>Analysis of Complex 3-D Sheet Forming Processes</b> University of Palermo (Italy)	<b>3</b>
<b>On the Use of 3D Finite Element Simulation in Design of Industrial Bending Processes for Aluminum Alloy Profiles</b> SINTEF Materials Technology (Norway)	<b>5</b>
<b>Coupled Fluid/Structure Finite Element Analysis Using The FIDAP/MARC Interface</b> Fluid Dynamics International (USA)	<b>23</b>
<b>A Non Linear Finite Element Model for Plaster Plate Panels Associated to Steel Stiffners</b> Centre Scientifique et Technique du Batiment (France)	<b>33</b>
<b>Linear Elastic Fracture Mechanics Benchmarks: 2D Finite Element Test Cases</b> Nanyang Technological University (Singapore)	<b>45</b>
<b>The Activity for MARC FEA in Taiwan Market by TATUNG</b> TATUNG Co. (R.O.C.)	<b>59</b>
<b>Adaptive Finite Element Techniques and Damage Evolution</b> MARC Analysis Research Corporation-Europe (The Netherlands)	<b>61</b>
<b>A Practical Adaptive Meshing Strategy for Nonlinear Analysis</b> MARC Analysis Research Corporation (USA)	<b>67</b>
<b>3D Non-Linear FEA Contact Analysis Simulation of In -Vivo Barrel Type Stent Expansion Using a Pressurized Catheter Balloon</b> Medtronic Incorporated (USA)	<b>83</b>
<b>Application of Non-Linear FEA Contact Analysis for Evaluation of Interaction of Pacing Leads with Extruded Silicone Rubber Multi-Lumen Sheaths</b> Medtronic Incorporated (USA)	<b>95</b>

**Stress Intensity Factor for Mixed Mode Fracture in Adhesive Bonded Joints** 107  
Nanyang Technological University (Singapore)

**Improved Contact Algorithm for Analytical Surfaces** 123  
MARC Analysis Research Corporation (USA)

*IV Polymers & Composites*

**Applicability of TCM to complex structures** 203  
TOYOBO Co., LTD

**Numerical Analysis of New Polymer Processing** 229  
*(Gas Assisted Injection molding method/Three – dimensional Flow Analysis of Molten Polymer)*  
MITSUBISHI Engineering Plastics Co., Inc.

*VII Educational & Computational Science*

**A Study on Domain Decomposition Method for Structural Analysis** 357  
MARC Analysis Research Corporation

*VIII MARC Technical Papers, 1993-1994*

**Hot Clamp Design for LMFBR Piping Systems** 379  
Kobayashi, Tateishi  
ASME Journal of Pressure Vessel Technology, Vol. 115, pp. 47-52,1993
