

# Newsletter

Q1 2011

---

## Greetings to the MSC Technology Partner Community!

Thank you for your loyalty as we have been rebuilding our Partner Program over the last year. This issue is the first of the new quarterly series of newsletters you will receive from MSC's Partner Program, in addition to important announcements and invitations as news becomes available.

This first issue is all about making contact with you and to introduce ourselves. The Q2 issue will focus on the upcoming re-launch of MSC's Technology Partner program. With significant updates coming to our Website, more clarity around program benefits and obligations, and better branding, our objective is to build partnerships that grow your business.

Please feel free to share this newsletter with any of your colleagues who might be interested, and encourage them to subscribe by replying to [PartnerProgram@mscsoftware.com](mailto:PartnerProgram@mscsoftware.com).

Through this transition, we welcome your input and feedback, and request your patience. Our contact information is at the bottom of this newsletter.

## WELCOME NEW PARTNERS!

**Collier Research Corporation** - *Collier Research Corporation is one of the world's leading engineering software providers to the aerospace industry and NASA, providing structural tools, methods research, and software solutions with its flagship product, HyperSizer. As a trusted industry leader, HyperSizer provides aerospace stress analysis and sizing optimization, reducing the weight of aircraft and space vehicles, whether designed with composites or traditional metallic materials.*

**ForceFive** - *ForceFive AG, founded in 2002, is a Munich based independent consulting and software company. The business focus is on the development and deployment of high-performance software tools and methods for the concept design process and on consulting companies in the mobility industry to that effect.*
